SUMMARY

Self-starting product designer with a CS degree, dual UX certifications, and a proven track record freelancing on global campaigns. Combines design thinking with technical fluency to bridge the gap between UX & engineering. Driven to solve complex product challenges and create intuitive, high-impact solutions for users, businesses, and teams.

EXPERIENCE

Product Designer — Freelance

MAY 2025 – PRESENT

- Launched custom websites for artists and small businesses using AI-driven workflows, driving outcomes such as 30% subscriber growth and 96% operating cost reduction.
- Redesigned Tommy Hilfiger's POS checkout flow, cutting transaction time by 50% and prompting management to explore wider implementation.
- Co-led teams at design-a-thons hosted by Amazon, Stanford, FSU, and Bridgegood Academy, delivering polished solutions for real social and business challenges.

Design Instructor — StreetCode Academy

JANUARY 2025 – JUNE 2025

- Facilitated weekly workshops in product design and AI tools (Replit, ChatGPT) as a volunteer for 15+ students from underrepresented backgrounds.
- Guided product strategy and prompt engineering of an AI speech-to-ASL app which earned strong praise from Amazon employees at the final showcase

Graphic Designer — Freelance

MARCH 2018 – MAY 2025

- Launched an independent freelance practice serving nonprofits and independent artists with print and digital design.
- Acted as a trilingual creative partner, translating client goals into compelling visuals through a feedback-driven process.

IT/Lab Intern — Tarana Wireless

JUNE 2019 – AUGUST 2021

- Optimized user experience across engineering labs by designing clear guides, streamlining cable systems, and developing a Python health check script—while resolving 50+ weekly IT issues through cross-functional collaboration.
